

Press release from AVISA UK

March 2011

FOR IMMEDIATE RELEASE

AVISA Aviation Safety Systems Ltd announces new strategic partnership with Fokker Services

AVISA Aviation Safety Systems Ltd is pleased to announce its new strategic partnership with Fokker Services. The partnership will see the introduction of EASA Part M approved Continuing Airworthiness and Maintenance Management Services (CAMO) to the FLYFokker program. The new collaboration will offer operators and aircraft owners customised Continued Airworthiness Management Organisation support to ensure fleet worthiness according to EASA standards.

In today's climate a cost effective CAMO service can provide exactly what is needed to keep fleets airworthy, reliable and flexible. This new service combines Fokker Services in-depth Type Certificate Engineering know how with the specialist EASA Part-M regulatory knowledge and CAMO infrastructure of AVISA.

"Collaborating with such a well known name in the aviation industry is a privilege," explained Justin Goatcher, Managing Director of AVISA. "Using our expertise and knowledge combined with access to Fokker Services highly skilled engineering department will give customers a CAMO service that manages maintenance requirements to the most detailed level and provides a one stop fleet engineering and CAMO service."

"Fokker Services holds a reputation as an independent service provider. AVISA's positioning as an independent airworthiness and safety specialist therefore fits perfectly in the Fokker philosophy. The partnership between Fokker and AVISA will provide the high quality and independent services that our customers value," says Erik Goedhart, Vice President Marketing and Sales of Fokker Services.

AVISA and its sister company AVISA Gulf bring approved aviation safety services to partners throughout the world, routinely providing expert services and training to airlines, fleet and individual operators and maintenance repair organisations (MRO).

AVISA endeavours to ensure operators and owners remain compliant with all safety and airworthiness regulations. The company's aviation experts provide innovative, safety enhancing, cost effective and more visible systems for managing aircraft and their required maintenance.

Notes to editors

About Fokker

At present there are more than 600 Fokker aircraft operational across the world. The Fokker aircraft has earned a reputation for advanced technologies, comfort, operational reliability, low noise level and durability. Many consider the Fokker among the best mid-size aircraft ever built. Besides the Fokker aircraft, Fokker Services is serving operators with the Bombardier Dash 8 and other out of production aircraft, with its logistic flight hour program ABACUS.

Fokker Services is part of Fokker Technologies, which develops and produces advanced components and systems for the aerospace industry, and supplies integrated maintenance services and products to aircraft owners and operators. In 2009 the group achieved a turnover of € 602 million with 3,500 employees.

About AVISA

Committed to providing the highest level of aviation services to this rapidly growing marketplace, AVISA delivers total technical support through:

- Continued Airworthiness and Maintenance Management (CAMO)
- AVISA's CAMO services enable commercial and corporate clients to achieve better despatch reliability, increased cost savings and improved safety levels.
- Continued Airworthiness and Quality Safety Consultancy
- EASA approved, with good local knowledge, AVISA is able to provide businesses with support and advice across a global range of regulatory issues and requirements.
- Aviation Safety Training: Tailored to the needs of each individual business, AVISA's courses aim to bring all staff to a common level of understanding for a positive impact on the whole business. AVISA's training delivers reduced costs, increased profitability and competitive edge.
- This year AVISA was announced as a Ministry of Defence Approved Learning Provider under the Enhanced Learning Credits ("ELC") scheme and is now authorised to supply two CAA International ("CAAI") training courses to ELC funded learners. In order to achieve this status, AVISA had to undergo a rigorous application process of several months, assessing their operations and training facilities and finding them to be of a sufficient standard to satisfy the high expectations of the MoD.
